PROJECT BUILDERS

Power BI

Beginner to Intermediate

Microsoft Power BI Course Introduction

2. Data Visualization-ExplainationChart - Basics --

1. -- CONNECTING TO POWER BI and DIFFERENT DATA SOURCES --

-Connecting Power BI to different Data ~Sources-
About the data and the way forward
Connecting to a CSV file
Connecting to an SQL database
Getting data from all files in a folder
Getting data from an XML file

Preparing and Manipulating data using Power Query(Data Transformation)

---

1 Introduction to Power Query Editor

2 Important checks before we transform data

3 Column Quality, Profile & Distribution

4 Merging and Appending Queries Theory

5 Appending Queries in Power Query Practical

6 Merging Queries in Power Query Practical

Power BI

Beginner to Intermediate

7 Manage table rows and columns
8 Split Column tool
9 Replace Values tool
10 Group By tool
11 Pivoting and unpivoting Theory
12 Pivoting and unpivoting in Power Query
13 Extract tool
14 Format Text options
15 Number transformations
16 Date and Time transformations

Adding new columns using Power Query

17. Add column from examples
18. Add a custom column
19. Add conditional and Index column

--- DATA MODELING (Creating a data model using relationships)

1-Introduction to Model View
2-Creating and modifying relationships
3-Cardinality and cross filter direction
4-Fact and Dimension tables
5-Star and Snowflake schemas
6-Data Pane and the Properties Pane

Power BI

Beginner to Intermediate

***** DAX (Data Analysis Expression)**

01 Introduction to DAX
02 DAX syntax and Row context vs Filter context
03 Types of operators and functions
04 Demonstration of new columns and new measures
05 DAX BASIC FORMULAS PART 1: (CALENDAR(), DATE(), MONTH(), WEEKDAY(), WEEKNUM(), FORMAT(), CONCATENATE() LEFT(), RIGHT(), LEN() MID())

DATE FUNCTION

1-CALENDAR()
2-DATE()
3-MONTH()
4-WEEKDAY()
5-WEEKNUM()
6-FORMAT()

TEXT FUNCTIONS

7-CONCATENATE()
8-LEFT()
9-RIGHT()
10-LEN()
11-MID()

****DAX (Data Analysis Expression) continuation with...:**

AGGREGRATE FUNCTIONS:

12-SUM()
13-SUMX()
14-MIN()
15-MINX()
16-MAX()
17-MAXX()
18-AVERAGE()
19-AVERAGEX()
20-COUNT()
21-COUNTX()
22-PRODUCT()
23-PRODUCTX()
24-FILTER()

PROJECT BUILDERS

Power BI

Beginner to Intermediate

DATA VISUALIZATION

1-Creating Charts and Visuals in Power BI

2-Advanced chart

CAPSTONE PROJECT

CAPSTONE PROJECT

1 - Business Requirements

2 - Loading Data to PBI Desktop

3 - Data Profiling

4 - Data Transformations

5 - Primary & Foreign Key

6 - Cardinality

7 - Star Schema

8 - Data Model Overview

9 - Different Types of Filters in Filters

1O - Top Bottom 5 Products By Sales, Quantity & Profit

11 - Sales Trends Over Time

12 - Other Requirements

13 - Requirement For DAX

14 - Requirement For Edit Interactions

15 - Other Remaining Requirements

16 - Changing Filter Behaviour for Dimension Table Slice

17 - Publishing to PowerBI Service

18 - Capstone Project

END OF PowerBI

Publishing to Power BI Service
